ABSTRACT

In the current era of globalization, the development of technology and the growth of business

activities are increasingly advanced and fast which encourages a company or businessman who

has sprung up to conduct a competition in the marketing sector, both from the activity of selling

goods and services. The increasing number of coffee shop business people will have an impact

on increasing the quantity of coffee products and increasing competition between coffee shop

businesses.

This research was conducted on the people of Semarang City who had bought at Dol Kopi. The

number of samples in this study were 101 respondents. The data collection method is through

questionnaires and the sampling method in this study is non-probability sampling with purposive

sampling technique. The analytical tool used in this research is Structural Equation Modeling

(SEM).

The results of this study indicate that the quality of service, promotion and price have a positive

and significant effect on brand image, and the results of this study also show that brand image

has a positive and significant effect on repurchase intention. The most influential variable on

repurchase interest is Promotion.

Keywords: service quality, promotion, price, brand image, repurchase interest.
