

ABSTRACT

This study aims to examine the impact of good corporate governance and corporate risk disclosure on the firm performance of banking companies listed on the Indonesia Stock Exchange (IDX) for the period 2019 until 2021. The GCG bank that is researched involves the board of commissioners, audit committee, audit quality and risk committee. This study refers to previous research conducted by Rahman (2019).

The analytic method used in this study is the multiple regression calculated through the SPSS platform to test the proposed hypothesis. The multiple regression trial is utilized to observe the simultant effect of good corporate governance and corporate risk disclosure included as independent variables in this study on firm performance.

The study found that audit committee and risk committee variables have a positive effect on firm performance. Meanwhile, board of commissioners, audit quality and risk disclosures variables have no significant effect on firm performance.

Keywords: Good Corporate Governance, Risk Disclosure, Corporate Performance
