

ABSTRACT

This paper uses semilog model to analyze the impact of the US-China trade war on Indonesia's exports in the manufacturing sector case study of six countries ACFTA. This study uses panel data from 6 ACFTA countries period 2011-2021. The dependent variable in this study is Indonesia's exports in the manufacturing sector while the independent variables in this study are economic distance, the real exchange rate and the dummy trade war of the US-China. The results of this study indicate that there is an effect of economic distance on Indonesia's exports in the manufacturing sector. The real exchange rate is not significant effect on Indonesia's exports in the manufacturing sector. There is an impact of the US-China trade war on Indonesian exports in the manufacturing sector.

Keywords: Manufacture Export, Economy Distance, Real Exchange Rate
