

## **ABSTRACT**

*Village Cooperative (KUD) Mojosongo is one of KUD in Boyolali district which has dairy field as the main business. The members of this cooperative are dairy cow farmers who are expected be able to play a role in improving the welfare of its members through the business results (SHU) obtained.*

*The aim of research is to see the influences of the number of members, personal capital, loan capital, and business volume to the business results (SHU) of KUD Mojosongo in Boyolali district. This study uses Ordinary Least Square method and classic assumption of deviation detection using time series in 1997-2018 sourced from accountability report of management and supervisors KUD Mojosongo in Boyolali district.*

*The results show that the number of members, personal capital, loan capital, and business volume significantly take positive effect to the business results of KUD Mojosongo in Boyolali district. The higher the number of members, personal capital, outside capital, and business volume, it is also the higher the business results obtained by KUD Mojosongo in Boyolali district.*

*Keywords: KUD Mojosongo, dairy unit, business results (SHU), number of members, personal capital, loan capital, and business volume.*
