

ABSTRACT

This study aims to analyze the effect of good corporate governance on firm value. The dependent variable in this study is firm value, while the independent variables are managerial ownership, institutional ownership, independent board of commissioners, audit committee, and board of directors. The sampling method used in this study is purposive sampling of banking companies listed on the Indonesia Stock Exchange (IDX) for the period 2020 to 2022. The sample data in this study amounted to 37 companies. The analytical model used is multiple linear regression analysis. The results of this study indicate that institutional ownership has a significant effect on firm value, while other independent variables do not have a significant effect on firm value.

Keywords: Good Corporate Governance, Firm Value, Managerial Ownership, Institutional Ownership, Independent Board of Commissioners, Audit Committee, Board of Directors
