

ABSTRACT

This research aims to examine the factors affecting the success rate of provider selection at the Otoritas Jasa Keuangan (OJK). The independent variables examined in this study include general procurement planning, provider selection planning, information systems, and regulatory frameworks. The dependent variable is measured through the success rate of provider selection.

To test the relationships among these variables, this study employs a Structural Equation Model (SEM) approach using Partial Least Squares (PLS) as the estimation method with 150 (one hundred and fifty) respondents.

The results indicate that General Procurement Planning, Provider Selection Planning, Information Systems, and Regulations have a positive and significant influence on the success rate of provider selection at the Otoritas Jasa Keuangan.

Keywords : General Procurement Planning, Provider Selection Planning, Information Systems, Regulations, Success Rate of Provider Selection.
