

ABSTRACT

The purpose of this study is to analyze the effect arising from the characteristics of corporate governance by proxy size of the board of directors, the independence of the board of commissioners and the size of the audit committee with the ownership structure with a proxy family ownership, institutional ownership, public ownership and foreign ownership of the company's performance. Dependent variabel in this research is the company's performance measured by Tobin's Q.

Total sample in this study are 44 companies listed in Indonesia Stock Exchange during 2010-2014. The sampling method used is purposive sampling method with predetermined criteria. This study uses multiple reggression analysis to examine the effect of the characteristic of the corporate governance and ownership structure on company's performance.

The results of this study indicate that the size of the board of directors, audit committees and public ownership positively affects company performance measured by Tobin's Q. But the independence of the board of commissioners, family ownership, institutional ownership and foreign ownership has no effect on company performance measured by Tobin's Q.

Keywords :Boardsize, Independence of Board Commisioner, Size of The Audit Committee, Family Ownership, Institutional Ownership, Public Ownership, Foreign Ownership, Company's Performance.
