ABSTRACT

The study aimed to examine the influence of board size, audit comitte, profitability and firm size on companies value. Companies value was measured by using Prrice Book Value.

Data gathering used the purposive sampling method on the manufacturing companies listed in the Indonesia Stock Exchange in 2011 to 2014. As many as 65 manufacturing companies were used as sample.

The result proved that board size has no significant influence on companies value. Audit comitte has no significant influence on companies value. Profitability has a significant positive influence on companies value. Firm size has a significant positive influence on companies value.

Keyword: Board Size, Audit Comitte, Profitability, Firm size Companies Value and Price Book Value.
