

ABSTRACT

The objective of this research is to analyze the influence of Internal Corporate Governance Index (ICGI) and Ownership Structure on the level of Bank Performance. Measurement of Bank Performance utilizes ROA based on ratio of net income divided by total assets and ROE based on ratio of net income divided by total equity. This research refers to research conducted by Dedu and Chitan (2013).

Population of this research were banking companies that listed in Indonesian Stock Exchange (IDX) during 2011-2013. Data were collected by using purposive sampling method with criteria company which publish annual report consistently and have the shares owned by foreigner. A total data of 51 observations were analyzed. Multiple linear regression analysis was used as a main analysis tool.

The results of this research show that Ownership Structure significantly influence the level of Bank Performance. Whereas, Internal Corporate Governance Index (ICGI) have no significant effect on the level of Bank Performance.

Keywords : Bank Performance, Internal Corporate Governance Index (ICGI) and Ownership Structure (OS)
