

## ***ABSTRACT***

*Firm Value greatly affects the prosperity of the company's shareholders and owners. This research is motivated by the phenomenon of the gap between the empirical data of the average manufacturing companies listed on the Stock Exchange. The purpose of this study was to examine the influence of Managerial Ownership, Institutional Ownership, Debt to Equity Ratio, and Return on Assets of the Company's value as measured by TobinsQ.*

*The sample in this study is a manufacturing company located in Indonesia Stock Exchange (IDX) 2010-2012 and qualified totaling 35 companies. The data used in this research is secondary data which is a cross section, as well as time series data.*

*The results of this study states that no significant influence of Managerial Ownership on Firm Value. But there is a significant positive effect on Institutional Ownership variables. It also found there is a significant positive effect of DER and ROA, which means that the greater the DER and ROA of the company, the greater the Firm Value.*

*Keywords: Managerial Ownership, Institutional, DER, ROA, Firm Value.*
