

## **ABSTRACT**

*The tourism sector is a potential sector to be developed as a source of regional income. Sharia-based tourism is currently developing rapidly in Indonesia and one of the Sharia tourism objects frequented by Muslim tourists is religious tourism, the building of historic mosques and pilgrimage sites*

*This study discusses factors such as income, facility travel costs, religiosity related to the number of tourist visits at Banten Grand Mosque This study uses primary data that is cookie cake with a sample of 100 tourists visiting the Banten Grand Mosque. The sampling technique uses accidental sampling and the analytical method used is multiple linear regression.*

*Based on the results of research conducted can be known about the costs, and positive facilities for tourist visits while negative travel costs and religiosity do not affect tourists visiting the Banten Grand Mosque.*

*Keywords: income, travel costs, facilities, religiosity, the number of tourists visiting the Banten Great Mosque attractions.*
