

## **ABSTRACT**

Corporate Value reflects the company or fund management capabilities in the target capital structure (financing activities), investment management capabilities in the effective use of assets (investing activities) and operations management capabilities to streamline the process of production and distribution (operating) companies. This study aimed to analyze the influence of Institutional Ownership, Ownership Management, DER and ROA of the Company's Corporate Value LQ-45 at the Indonesia Stock Exchange in 2008-2010.

The sample used is a Company in Indonesia Stock Exchange during the period of 2008-2010 the 2008 - 2010 always included in the LQ-45 totaling 39 companies. The analysis used multiple regression test, the t test as a means of testing the hypothesis.

Based on the analysis concluded that the effect on Corporate Value, ROA LQ-45 period from 2008 to 2010. While variable Institutional Ownership, Management and Ownership DER no effect on the value of the Company. For the management of the Company increases the value of corporate value by increasing its profits. To improve the earnings management can obtain it by means of operational efficiency. The results of this study indicate that investors in order to not only use fully the financial ratio data published by certain agencies, investors should conduct a thorough analysis of the financial statements from various sources as there are indications of published financial statements has a vested interest in the company.
