# ABSTRACT

*Human Development Index (HDI) is one indicator of development progress on aspects of human quality in a country. This research aims to analyze the effect of PDB percapita, government expenditures, and unemployment against HDI in ASEAN's countries*

*The analytical method used in this research is random effect model (REM). This research used secondary data in panel form containing 6 Countries at ASEAN on cross section data and 2009 until 2018 on time series data. Data processed with Eviews10.*

*The result of this examine shows that GDP percapita and government expenditures has positive and significant effect for HDI in ASEAN. Meanwhile, unemployment are insignificant for HDI in ASEAN.*

*Keywords: HDI, GDP percapita, government expenditures, unemployment, random effect model*
